

About 1,000 WOFFLES Lifts **10** have been performed to date.

# 9 FaceTime 1

**9** Dr Wu currently charges \$6,000 to \$12,500 for the WOFFLES Lift with the WOFFLES Threads, compared to a traditional facelift which costs between \$15,000 and \$17,000.

**1** Named after its founder, Dr Woffles Wu, the WOFFLES Lift uses a unique non-surgical technique he invented that injects several lines of self-retaining barbed threads into the face and out through the scalp, elevating the sagging tissues in a more natural, upward direction.

**10 things** you must know about the famed **WOFFLES Lift** which is celebrating its 10th anniversary this year!

**8** Effects of the WOFFLES Lift last about two to four years, after which patients will have to go in for another procedure to regain their rejuvenated look.

**2** The WOFFLES Lift technique eliminates the need for stitches in the skin. In fact, the fine needle leaves no permanent marks on the face.

**7** This treatment offers dramatic rejuvenation for most patients, in some cases allowing patients to look up to 15 years younger.

**3** Compared to a traditional facelift that takes about five hours, this procedure is performed under local anesthesia, takes 20 to 40 minutes to perform, has minimal swelling or bruising and patients recover within 24 hrs.

**6** The WOFFLES Lift is for people in their mid 30s to late 50s who are beginning to see the first signs of ageing and sagging of supporting tissues. The technique has also been used successfully for patients in their 70s.

**5** The idea came about when Dr Wu was examining a patient who told him that she wanted to have a facelift but also wanted to attend a party that weekend. None of the techniques he had then enabled him to do that, so he came up with the WOFFLES Lift just for her.

**4** This novel facelift rejuvenates and lifts without excising any skin and patients are able to resume activities that very day!
